Installing Carpov & Magnus on macOS

1. Download driver package from the Xerox website

XX.X.XeroxPrintD river.X.XX.X.dmg

Open the Disk Image

Google "Xerox Phaser 7800 GX" and Choose the appropriate download for your computer.

You must be logged on to eduroam to complete this process.

Run the installer for your system.

Its ok if these screens look slightly different. they change with each version but the steps they guide you through are the same.

<u>Dont</u> try to add the printer inside the installer. We'll do this in a later step.

If it says installation failed, its probably because of this, and its actually fine.

3. Once you have run the installer, open system preferences to add the printer.

Repeat this process for the other phaser.

You should end up with someything like this:

Printers		
Carpov	Magnus	
Idle	Open Print Queue	
Magnus Idle, Last Used	Options & Supplies	
	Location:	
	Kind: Xerox Phaser 7800GX, 2.94.3	
+ -	Share this printer on the network Sharing Preferences	
	Default printer: Last Printer Used	
	Default paper size: US Letter	2

Its ok if the icons look different or the version numbers are different. These things get updated frequently.
