

How to Print from your Mac Laptop

Leopard Operating System Required

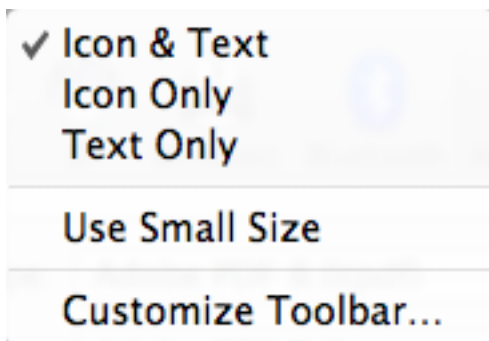

Go To System Preferences and select “Print and Fax”

Click on the + button

In order to set the remaining options, you must add the “Advanced” icon to the add printer toolbar. To do this, ctrl-click on the toolbar and select “Customize Toolbar...”.

Then, drag the advanced button onto the toolbar.

Select Advanced then specify the following printer settings.

Type: Windows

Device: Another Device

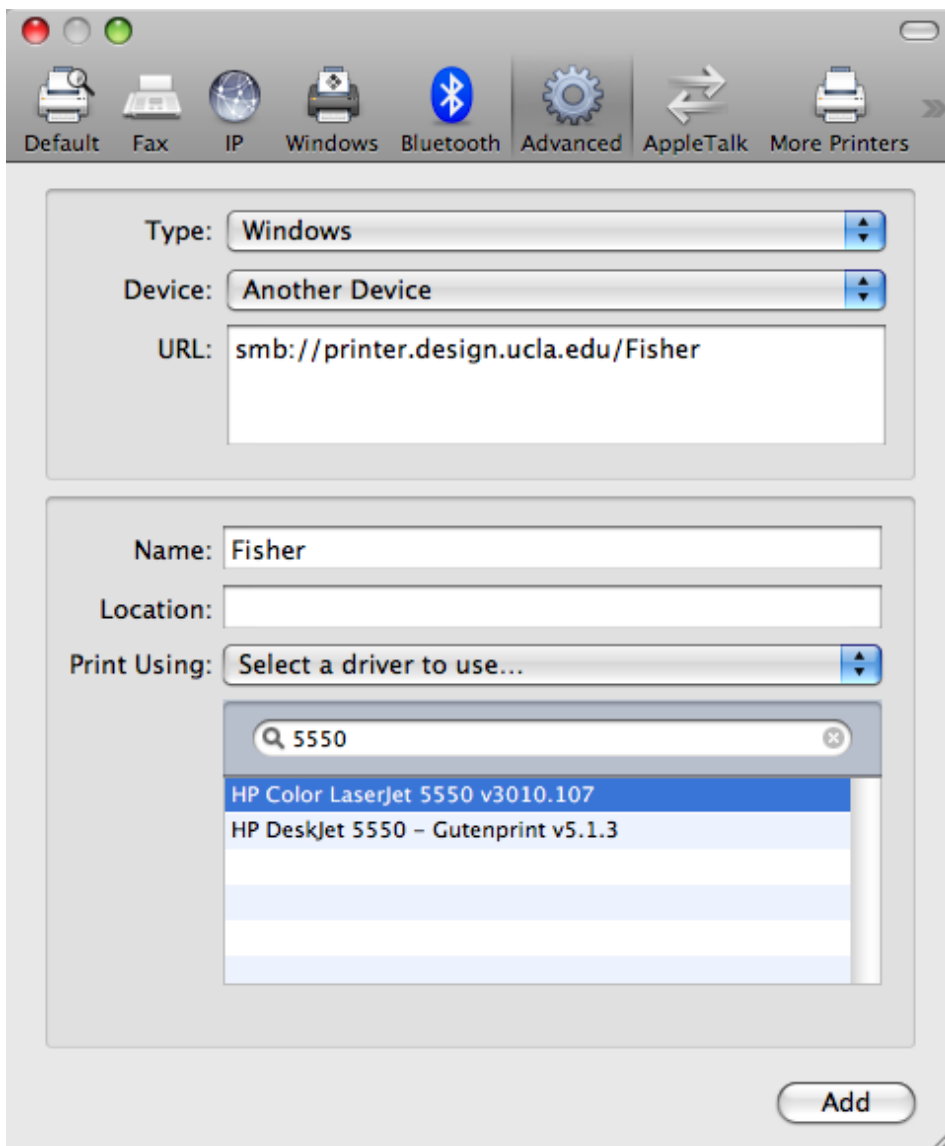

URL: smb://printer.design.ucla.edu/Fisher

Name: Fisher

Location (optional): leave blank

Print Using: Select a driver to use...

Search “5550” and select “HP colorlaserjet 5550 v3010.107”

Click “add”

In the following window, check the “Tray 3” box

Change Printer Disk settings to “RAM Disk”

Change Total Print Memory to : “416-544 MB RAM”

Check the “Duplex Unit” box

Change Paper Matching settings to “Nearest Size and Scale”
